

SPORTSMEN ARE ORDERING MORE AND MORE OF TERRELL'S A-1 WILD DUCK MILLET EACH YEAR. THE BEAR CREEK CO. OF CALIFORNIA PLANTED 300 LBS. OF THIS SEED ONE YEAR. IT ATTRACTED SO MANY DUCKS AND PHEASANTS THAT THE FOLLOWING YEAR THEY ORDERED 2,000 LBS. A CUSTOMER ON THE ILLINOIS RIVER PLANTED 500 LBS. ONE SEASON - 1,500 LBS. THE NEXT. HE CLAIMED THAT HE HAD THE BEST DUCK HUNTING OF ANY PLACE ON THE ILLINOIS RIVER. THIS IS ONE OF THE VERY BEST AND CHEAPEST FOODS YOU CAN PLANT FOR WILD DUCKS, GEESE, PHEASANTS, AND QUAIL.

HOW TO GROW DUCK MILLET: DUE TO THE EXTREMELY HIGH GERMINATION AND PURITY, IT TAKES ONLY A 100 LB. BAG OF TERRELL'S A-1 WILD DUCK MILLET SEED TO SOW 4 TO 5 ACRES. THERE ARE TWO WAYS TO PLANT IT:

1. If you can control your water level, lower or dry the pond or lake or a strip around the shore line. Broadcast the seed while the soil is still wet and muddy. From time to time let in enough water to keep the ground moist, but not flooded. When the seed is formed, flood with 6 to 10 inches of water and you will have a wonderful place for ducks. After it is a foot high it will grow in up to 6 inches of water.
2. If you cannot manipulate the water level, keep some of the seed on hand and scatter it on the bare mud as fast as the water goes down during the summer and fall months, or sow the seed on lowland areas, mud flats, and land along the water's edge. If the soil is wet and muddy, nothing further need be done. If the soil is dry, disc or drag to loosen it up, broadcast the seed, then drag to cover it. On small areas this may be done with an iron garden rake. Rake to loosen the soil, broadcast seed, and rake in as you would grass seed on a lawn.

WILD DUCK MILLET SEED MAY ALSO BE PLANTED ON ANY LAND THAT CONTAINS ENOUGH MOISTURE TO GROW A GOOD GARDEN. IN STRIPS OR PLOTS NEAR BRUSH OR MARSH, IT MAKES GOOD FOOD FOR PHEASANTS, QUAIL, AND OTHER UPLAND GAME BIRDS. FOR DUCKS AND GEESE IT SHOULD BE PLANTED NEAR WATER.

DUCKS AND GEESE LIKE TO GRAZE ON THE TENDER SPROUTING PLANTS TWO OR THREE WEEKS AFTER THEY ARE PLANTED, AS WELL AS ON THE RIPENED GRAIN. WILD DUCK MILLET MATURES IN ABOUT 60 DAYS OR LESS. IT GROWS 2 TO 4 FEET HIGH, MAKING EXCELLENT COVER. IN THE NORTHERN HALF OF THE UNITED STATES PLANTINGS ARE USUALLY MADE DURING JUNE, JULY, AND AUGUST. IN THE SOUTHERN HALF OF THE UNITED STATES PLANTINGS ARE MADE DURING AUGUST, SEPTEMBER, AND OCTOBER. OFTEN CALLED THE "WILD RICE OF THE SOUTH", WILD DUCK MILLET IS A VERY IMPORTANT DUCK FOOD TO SOW IN THE CITRUS FRUIT COUNTRY OF THE SOUTH DURING FALL AND WINTER. IT IS ALWAYS WELL, UNLESS YOU HAVE IRRIGATION, TO PLANT SO AS TO TAKE ADVANTAGE OF RAINFALL. ON THE PACIFIC COAST WHERE THERE ARE FOG AND COOL NIGHTS, IT OFTEN TAKES THREE MONTHS FOR IT TO MATURE. PLANTINGS THERE MAY START AS EARLY AS MAY.

THE "CYCLONE" SEED SOWER

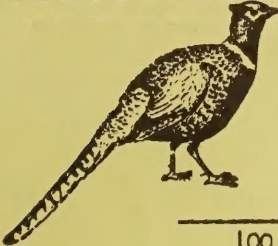

THE SOWER THAT SCATTERS EVENLY

AN EASY AND EFFICIENT WAY TO SOW WILD DUCK MILLET AND OTHER SEEDS.

THE CYCLONE SEEDER PICTURED HERE IS BUILT FOR DURABILITY AND ACCURATE WORK. IT IS LIGHT AND EASY TO OPERATE. BY TURNING THE CRANK, THE SEED IS SCATTERED EVENLY AND EFFICIENTLY. EASIER AND MORE ECONOMICAL THAN SOWING BY HAND.

Price postpaid - \$4.30 each.

TO ASSURE YOURSELF OF AN ABUNDANCE OF WILD DUCKS, GEESE, AND OTHER GAME THIS FALL, mark your order on the blank below and mail NOW to: TERRELL'S, Oshkosh, Wisconsin.

WE WANT TERRELL'S DUCK MILLET !!!

READ WHAT OTHERS SAY:

"YOUR WILD DUCK MILLET IS THE BEST THING HERE. WATER CAN STAY UP HIGH LATE IN THE SEASON AND STILL IF I CAN HAVE A FEW WEEKS IT WILL MATURE. I JUST BROADCAST THIS SEED AS THE WATER GOES DOWN. IT GROWS VERY FAST AND RANK. THERE COULDN'T BE A BETTER DUCK FOOD. MALLARDS GO WILD FOR IT!"

R. J. GILLOTT, CLEAR LAKE OUTING CLUB, MASON COUNTY, ILLINOIS

"I GOT A GREAT SURPRISE TO SEE THE WAY YOUR WILD DUCK MILLET HAS GROWN. IT IS SIMPLY GREAT!"

JOHN BRUCE ALLEN, SCHUYLER COUNTY, ILLINOIS

"The Wild Duck Millet which we obtained from you last year has been a great success in our rice fields and has attracted a heavy concentration of Mallards."

Dr. Carnes Weeks, MEDWAY PLANTATION, South Carolina

"THE PLANTING OF YOUR WILD DUCK MILLET AND OTHER DUCK FOODS AT LAKE ST. MARYS AND INDIAN LAKE...HAS GROWN VERY WELL AND HAS BEEN THE MEANS OF ATTRACTING LARGE NUMBERS OF WATER-FOWL AND IMPROVING DUCK SHOOTING...DUCKS WILL COME WHERE THEY HAVE FOOD AND ARE NOT OVER-SHOT."

J. W. STUBER, OHIO DIVISION OF CONSERVATION

"OUR SUCCESS WITH YOUR WILD DUCK MILLET SEED FAR EXCEEDED OUR EXPECTATIONS...AS THE BIRDS STARTED SOUTH IN THEIR MIGRATION OUR AREA, DUE TO THE PLANTING OF OUR MILLET, IMMEDIATELY BEGAN TO FILL UP WITH MIGRATORY BIRDS. IN FACT WE HAD SUCH TREMENDOUS NUMBERS OF BIRDS ON OUR CLUB THAT SOME OF THE WILD LIFE MEN AND STATE OFFICIALS IN THE GAME MANAGEMENT DEPARTMENT DROVE BY AUTOMOBILE INTO OUR AREA TO OBSERVE THE NUMBERS OF DUCKS BROUGHT IN BY YOUR MILLET...I SHOULD SAY MOST CONSERVATIVELY SPEAKING THERE WAS IN THE NEIGHBORHOOD OF BETWEEN FORTY AND SIXTY THOUSAND BIRDS."

ROBERT T. M'CLOSKEY, KERN COUNTY, CALIFORNIA
